Week of Quality - Training Workshop (Vaccines _ Medicines _ IVDs)

Dear Dr Nicknam,

I am writing to kindly inform you that the Local Production and Assistance Unit of WHO/HQ is organizing its 1st Week of Quality, a special event intended to be reiterated on a yearly basis. This year, the workshop will focus on the establishment of specifications to control the release of medicines, vaccines and in vitro diagnostics that are safe, effective, and of high quality.

This workshop will be virtual from 12 to 16 June 2023 using the Zoom platform. Detailed information is available in the attached concept note and flyer for your reference.

The specific objectives for the Week of Quality 2023 are to:

1. Provide guidance to manufacturers of essential medicines, vaccines and In-Vitro Diagnostics (IVDs) on the establishment of specifications to ensure the provision of medical products that are safe, effective, and of high-quality.
2. Provide guidance to manufacturers on how best to report the scientific and regulatory information related to the specifications, their acceptance criteria, and their justification in the product dossier to be submitted to the regulatory bodies.

The workshop is specially designed for manufacturers of medicines, vaccines and In-Vitro Diagnostics (IVDs) in Low- and Middle-Income Countries (LMICs). Regulators involved in the regulation and control of medicines, vaccines and IVDs from LMICs and from other countries with established local production are welcomed to register free and can be made through the link in the flyer.
